

GET POWERFUL McAfee SECURITY SOLUTIONS AT EXCEPTIONAL COST-SAVINGS!

Illinois Statewide Master Contract # CMS7966790

Security of networks and data is more important today than ever. The astonishing growth of malware, data theft, ransomware, and other threats makes it critical to maintain the best possible security. Public sector organizations, in particular, must safeguard the privacy of citizens and employees.

For over 16 years, Novanis has partnered with Intel Security (McAfee), the world's leading provider of security solutions. Novanis is proud to be designated as an Intel Security Alliance Premier Partner.

The Illinois Department of Innovation & Technology has established an indefinite quantity, Statewide Master Contract (CMS7966790) for all these Intel Security/McAfee solutions and services:

- Endpoint Protection
- Server Security
- Network Security
- Database Security
- Data Protection & Encryption
- Web Security
- Security Management
- Security Consulting
- Training
- Support & Services

There are many important benefits provided by this Master Contract:

- Exceptional savings on industry-standard McAfee security solutions.
- Simple procurement process. No requirement for multiple bids.
- The exceptional cost-savings are available to virtually any public sector organization in Illinois:
 - Any State Agency
 - Local Municipalities and Government Entities
 - Higher Education (Public & Private)
 - Community Colleges (Public & Private)
 - K-12 Schools (Public & Private)
 - Not-for-Profit Organizations

SECURITY OF NETWORKS AND DATA IS MORE IMPORTANT TODAY THAN EVER.

The fight against security adversaries and hackers is too big for any one organization or person to fight alone. The stakes are simply too high. Novanis and McAfee have built brands trusted by public sector organizations, and we have learned that when it comes to implementing the best security ... **There is power in togetherness.**

Rather than a fragmented landscape of security vendors, McAfee has harnessed an ecosystem of 125 cybersecurity vendors to work together via a common integration fabric. This strategy for protection, detection, and correction outmatches even today's most complex threatscape. That's powerful! And it's what Novanis can bring to your organization.

Download these important white papers and reports about the threat landscape and how powerful McAfee solutions protect your networks and data:
